

Congratulations on your new CADIVIUS BUTTERFLY SHELF® by dk3!

This shelf was designed in 1958 by legendary Danish designer Poul Cadovius.

It's a classic shelf. A subtle bookcase. A convenient storage for your everyday accessories. Or an aesthetic face-lift of the living room wall. The choice is yours.

CADOVIUS BUTTERFLY SHELF® is a perfectly executed shelf with a playful contrast between the lightness of the butterfly shape and the solid wooden material. This adds to a clean look with just one single detail: a laser-cut brand name on the "wing" as a testament to the authenticity of the one-and-only CADIVIUS BUTTERFLY SHELF® Poul Cadovius 1958 by dk3.

The shelf is available in solid oil treated walnut and oak.

Poul Cadovius' design universe covers a wide range of masterpieces. Both his life and designs testify to a genuine figure that went his own way – to the delight of us all.

We hope you will enjoy your new furniture.

Best regards

Mounting of your CADIVIUS BUTTERFLY SHELF®

We have made precise mounting easy by using this template

1. Just cut out the holes and use this template to mark the holes on your wall, where you wish to hang your CADIVIUS BUTTERFLY SHELF®.
2. Use a spirit level to make sure, that the shelf is hanging straight.
3. Use fastenings, which are suitable for the wall, e.g. screws and plugs.
The screws must protrude 50 mm.

Important information:

The CADIVIUS BUTTERFLY SHELF® can be mounted on many different wall surfaces as long as the wall has sufficient strength to carry the shelf and the loads on it. The screws provided are only intended for mounting the shelf directly onto wood. If you intend to mount the shelf on concrete, brick, hollow block, gypsum board or other materials, you will need appropriate fastening systems. The installation should be carried out by a qualified person.

dk3 can not be held responsible for wall damage caused by your CADIVIUS BUTTERFLY SHELF® or the mounting of it. Beware of sharp edges and that oiled furniture may contain surplus oil in the surface at the beginning.

Do not place the shelf near radiators or other heat sources, which can dry out the wood and cause cracking. Do not place hot or humid objects directly on the shelf, which may stain or damage it. In general, keep wooden furniture away from direct sunlight, which can darken some woods and fade others. Color changes may also occur when objects are left for extended periods in the same location on the furniture.

Care & maintenance for CADIVIUS BUTTERFLY SHELF® in oil treated oak or walnut:

The CADIVIUS BUTTERFLY SHELF® in both oak and walnut has an oiled finish that will occasionally need to be refreshed. For everyday care, use a cloth lightly moistened with water. Do not use detergents. If the solid wooden shelf is scratched, it can be sanded in the direction of the grain with fine abrasive paper (280–320 grit) and then oiled.

Apply oil with a clean cloth and leave it on the surface for approx. 15 minutes. Never pour oil or water directly onto the furniture surface. Treat the whole shelf. Wipe the furniture until the surface is clean and dry. Allow the wood to dry for 12 hours before use. Sanding and oil finishing should always be done in the direction of the wood grain. If you are treating the shelf with oil, remove it from the wall and re-fit it only after the oil has dried.

Warning! Risk of spontaneous combustion:

Cloths used for oil treatment present a risk of spontaneous combustion if not disposed of properly. Oil-soaked cloths and paper can for example be kept in an air tight container or can be wrapped in tin foil before being disposed of.
